CAREER OBJECTIVE

Aspiring Backend Developer with hands-on experience in Python, Django, REST API development, and database management. Passionate about building scalable web applications and solving real-world problems through technology. Strong interest in backend engineering, software architecture, leadership, and collaborative development environments.

PROJECTS

E-Commerce Platform

Developed a scalable e-commerce web application with authentication, product management, and responsive user experience using Python, Django, and SQLite.

Job Portal System

Built a recruitment platform featuring user authentication, job posting, and application management functionalities using Django and REST API.

Employee Management System

Designed an employee attendance and communication management system to improve organizational workflow using Python and Django.

React API Integration Projects

Integrated external REST APIs to create dynamic, responsive, and data-driven frontend applications using React.js.

Personal Finance Management System

Created a budgeting and expense tracking application for efficient personal finance management using HTML, CSS, and JavaScript.

Quiz & Productivity Applications

Developed interactive quiz and task management applications with clean UI and real-time functionality using JavaScript.
